

Do you manage patients on opioids? Consider Behavioral Health Integration

Are you concerned with...

- adhering to the **many CDC/medical board guidelines** for opioid prescribing?
- cost effectively implementing patient **risk stratification** processes?
- transitioning from Fee for Service to a **Value-Based Care Model** to show measurable, positive outcomes?

Why Implement WellBrain?

- ✓ **Happy Providers!** Peace of mind knowing you are in full compliance with opiate prescribing guidelines, improving care, while generating additional revenue.
- ✓ **Happy Patients!** Patients are more engaged and receive a better quality of care because providers have access to actionable insights.
- ✓ **Happy Staff!** Easy to implement and use platform. Turnkey assessments and report generation.

How it works:

- **Assess** patients' mental health using iPad administered assessments.
- **Engage** patients in their treatment plans using the WellBrainGo app.
- **Monitor** patients' progress with treatment plans using their individualized WellBrain Score.

**WellBrain BHI is billable using CPT 99484 (average \$50/month/patient)*
